

Memory

```
graph TD; Memory[Memory] --> Explicit[Explicit memory<br/>(declarative, conscious)]; Memory --> Implicit[Implicit memory<br/>(nondeclarative, unconscious)]; Explicit --> Episodic[Episodic memory<br/>(specific events)]; Explicit --> Semantic[Semantic memory<br/>(facts, general knowledge)]; Implicit --> Procedural[Procedural memory<br/>(motor skills, habits, tacit rules)]; Implicit --> Conditioning[Conditioning effects<br/>(e.g. conditioned emotional reactions)]; Implicit --> Priming[Priming<br/>(perceptual and conceptual priming)];
```

Explicit memory
(declarative, conscious)

Episodic memory
(specific events)

Semantic memory
(facts, general knowledge)

Implicit memory
(nondeclarative, unconscious)

Procedural memory
(motor skills, habits, tacit rules)

Conditioning effects
(e.g. conditioned emotional reactions)

Priming
(perceptual and conceptual priming)
